Fish Netting Policy

The retention ponds in Arbor Trace offer a fishing recreation opportunity for Association members and their guests. The quality of that experience is directly related to the health of the fishery and the stock in the ponds. It is the intent of the Board of Directors to preserve the fishery for the enjoyment of all members. To that end, the Board of Directors, by unanimous vote on August 30, 2007, has established a policy which

Prohibits the Netting of Fish

In addition, the Board encourages all anglers to practice catch and release and to use circle hooks, which have been proven to reduce fish mortality, when bait fishing.
